YANCY ONG

Melbourne, VIC
yong0027@student.monash.edu | 0451064537 | linkedin.com/in/yongsinong

Mechatronics Engineering student with strong hands-on experience in control systems, embedded development and mechanical fabrication. Competition-winning design experience with proven ability to integrate hardware and software into functional systems.

EDUCATION

Bachelor of Engineering (Honours) – Mechatronics
Monash University, Clayton
Expected Graduation: July 2027

Visa Status: Student visa subclass 500; eligible to apply for subclass 485 graduate visa after completion

Relevant Areas:
Embedded Systems, Control Systems, Engineering Mechanics, Manufacturing, Intelligent Systems

TECHNICAL SKILLS

Programming & Tools: Python, C/C++, Java, MATLAB, Microsoft Excel, Outlook

Embedded & Electronics: STM32, Arduino, circuit prototyping, sensor integration, hardware debugging

Control & Automation: PLC (Ladder Logic), hydraulic systems, sequencing logic design

CAD & Engineering Design: SolidWorks (CSWA – Full Marks), AutoCAD, engineering drawings

ENGINEERING PROJECTS & ACHIEVEMENTS

Warman Competition Robot — Champion, Monash Malaysia

- Worked in a team to design, prototype, and present a competition robot for the Warman Design and Build Competition.
- Contributed to concept generation, CAD modelling, technical documentation, and iterative design refinement.
- Proposed a feasible mechanical design approach that contributed to the team achieving **1st Place at Monash Malaysia**.

SmartFab: AI-Driven Voice-to-Product Manufacturing Concept

- Developed a competition concept for an AI-driven manufacturing system that converts natural language product requirements into a manufacturable workflow.
- Proposed a modular prototype integrating conversational AI, CAD generation, robotic material handling, and automated manufacturing demonstration.
- Contributed to feasibility analysis, implementation planning, and prototype simplification for a student engineering team.

FPGA-based embedded Camera System Project

- Designed and implemented an FPGA-based embedded camera system for image capture and digital processing.
- Worked with hardware-level logic, timing constraints, camera interface debugging, and system integration.
- Strengthened skills in embedded hardware, real-time system behaviour, and low-level troubleshooting.

PLC-Controlled Hydraulic Can Crushing Machine

- Designed PLC ladder logic for an automated hydraulic can crushing system involving hydraulic pump control, conveyor movement, actuator sequencing, and emergency stop logic.
- Assisted with electrical panel wiring, commissioning, and troubleshooting.
- Achieved approximately **70% volume reduction per cycle**.

Breathing Strain Sensor & Thermistor Measurement Projects

- Developed sensor-based measurement systems using strain sensing and thermistor-based temperature detection.
- Applied calibration, data collection, signal interpretation, and noise consideration to improve measurement reliability.

Monash Motorsport Recruit

- Participated as a Monash Motorsport recruit, gaining exposure to student-led motorsport engineering, design workflows, coding, documentation, and testing processes.

LEADERSHIP EXPERIENCE

Head of Events — Monash Foundation Year Student Council

- Led event planning, logistics, scheduling, and cross-team communication for student activities.
- Developed leadership, organisation, communication, and problem-solving skills through event coordination.

Team Leader — Engineering Design Unit

- Led team coordination, task allocation, and project progress tracking for an engineering design project.
- Supported final technical presentation delivery, contributing to a **Best Presentation Award**.

WORK EXPERIENCE

Design Engineer — Wah Lam Building Materials Limited, Hong Kong

Remote

- Supported 2D CAD drafting, proposal design, and project documentation under tight deadlines.
- Completed urgent design and documentation tasks while maintaining clear communication in a remote working environment.

Front of House Team Member — Angie Dumpling

- Provided customer service in a fast-paced restaurant environment while supporting smooth daily operations.

Event Crew — Proton, Kuala Lumpur International Mobility Show

- Engaged with visitors to promote Proton vehicles and explain product information.
- Supported event operations through customer communication, teamwork, and professional presentation.
